

Shuchiin University (種智院大学)

Evaluation summary

The result of certified evaluation and accreditation in 2013 concluded that the institution had not satisfied Item 3-6 “Financial Base and Fiscal Balance”, and as a result, it had not satisfied Standard 3 “Management, Administration and Finance”. This was because the institution had not formulated a mid- and long-term financial plan despite its extremely unstable financial base, and it had been necessary to make drastic improvements for the establishment of a stable financial base, including continuously securing income from student tuition and other fees.

However, it was determined that because the matters regarded as the reason why the institution had not satisfied the standard could be improved within a year, a final decision should be made based on the results of a re-evaluation, and that the evaluator should wait to make a comprehensive judgment on the evaluation results.

In 2015, the re-evaluation of Item 3-6 of the Standard 3 focusing on matters to be improved pointed out in the certified evaluation and accreditation in 2013 was conducted. As a result, it is confirmed that the institution has dealt seriously with the matters pointed out, and has already improved them. It is expected that it will make continuous efforts to conduct self-inspections and evaluations, and to guarantee and improve quality.
