

## NAGOYA UNIVERSITY OF ECONOMICS (名古屋経済大学)

### Evaluation summary

During the 2015 academic year evaluation and accreditation, with regard to the Point Evaluated 2-8 “Assignment and professional development of faculty” it was observed that the number of full-time faculty requisite to meet the Standards for Establishment of Universities was unsatisfactory, and therefore appropriate education and learning management was not being conducted and there was a need for fully-fledged reforms. The Point Evaluated was judged as unsatisfactory, as was Standard 2. “Learning and Teaching.”

However, as it was judged that it would be feasible to reform the cause of the standard deemed unsatisfactory within the space of one year, it was decided to wait for the results of the re-evaluation before making a final decision and the comprehensive judgment on the University had therefore been deferred.

With regard to Point Evaluated 2.8 for Standard 2, the results of an academic year 2017 re-evaluation centering on the matters for reform pointed out in the academic year 2015 revealed that the University had taken the content of these points seriously and the points in question had been reformed. It is to be hoped that University will continue to implement continuous self-inspection and evaluation, and do its best to achieve quality assurance and reforms.
