

## Ueno Gakuen University Junior College (上野学園大学短期大学部)

### Evaluation summary

During the academic year 2017 evaluation and accreditation, Point Evaluated 3-6 “Financial base and fiscal balance” was judged as being unsatisfactory, as was Standard 3. “Management, Administration and Finance.” The Junior College is in need of fully-fledged reforms because the financial assets of the Junior College’s incorporated entity as a whole are in decline, and it is in an ongoing state of being unable to secure a stable financial base.

However, as it was judged that it would be feasible to reform the cause of the standard deemed unsatisfactory within the space of one year, it was decided to wait for the results of the re-evaluation before making a final decision and the comprehensive judgment on the Junior College had therefore been deferred.

With regard to Point Evaluated 3-6 for Standard 3, the results of an academic year 2019 re-evaluation centering on the matters for reform pointed out in the academic year 2017 revealed that the financial assets of the Junior College’s incorporated entity as a whole are in a continuous state of decline, however, the fill-rate of the Junior College’s total capacity is rising, and revenue from the charges from students and pupils is on the increase. It is to be hoped that Junior College will continue to implement self-inspection and evaluation, and do its best to achieve quality assurance and reforms.
