## **Good practices**

- On the first and second floors of the Building 5 “Learning Cube”, an active learning space, Learning Support Center, English Learning Support Center and Teachers Education Center have been functionally established, and the fact that the students effectively use them is an initiative worthy of evaluation.
- The College Meister Program in which practical manufacturing is conducted through studio education enables students to gain hands-on experience in line with the educational principle of “the spirit of practical engineering.” Under the program, instruction is provided by senior year students to their juniors and the efforts are made that place an emphasis on students’ independency. These initiatives are worthy of evaluation.
